Grid cell - Wikipedia - Ruetz et
al. show that constitutively active
SMAD2/3 has a surprising ability
to boost the efficiency of cell
reprogramming both to iPSCs and
across lineages and may therefore
be a general factor that can
enhance
transcription-factor-mediated
reprogramming in a variety of
contexts. Sun, 15 Apr 2018

Cell Stem Cell - Apoptosis (from
Ancient
Greek
"falling
and
off") is a process of programmed
cell death that occurs in
multicellular
organisms.
Biochemical events lead to
characteristic cell changes and
death. Mon, 16 Apr 2018
15:10:00 GMT

We now suggest a portrayal of
this circuitry that is aligned with
individual hallmarks of cancer.
Thus, the intracellular integrated

circuit can be segmented into
distinct subcircuits, each of which
is specialized to support a discrete
cell-biological property in normal
cells and is reprogrammed in
order to implement a hallmark
capability in ... Hallmarks of
